

Operator Position

Desktop, Rackmount or Workstation

The *TDM Series* Operator Position is available in a: 1.) Desktop Configuration where the Console Interface Processor (CIP) is housed in a slimline desktop enclosure for placement on the operator's desk. 2.) Rackmount Configuration where the CIP incorporates a flat front design to mount flush in an **ORBACOM** cabinet. 3.) Workstation Configuration where the CIP is built in a personal computer-style tower for workspace-saving placement under the desk.

DESKTOP OPERATOR POSITION

Each position features an Orbacom PC based on the latest processor technology and built for reliability. For customers already equipped with an approved PC, the position may be configured without the PC, keyboard and monitor.

Utilizing a state-of-the-art graphical user interface based on the Windows 2000™ platform, the operator position is fully customizable by the user. Change any screen element, including modules, buttons, colors, backgrounds and sizes, to suit your needs.

Select 15", 17" or 21" conventional monitor or new LCD Flat Panel display, and Trackball, Mouse or Touchscreen operator control with any display option.

Choose from multiple Microphone, Foot Switch, Headset Jack, Headset Interface, Speaker and UPS products.

Integrated Recall Recorder (Single or Dual Channel) available.

Supports network operation.

Dimensions:

Desktop CIP: 17.26"W x 4.36"H x 15.60"D

Rackmount CIP: 19"W x 5.20"H x 15.11"D

Workstation CIP: 17.375"W x 4.38"H x 16.00"D
